During construction following measures are to be strictly taken to reduce the effects of dust pollution from building construction sites

- Properly covering all building materials stacked at site like cement bags, sand, lime & stone chips.
- Using water sprays or sprinklers to keep the dust down during activities such as concreting, plastering, breaking concrete and piling activities.
- Washing the wheels of vehicles leaving the site, if they are carrying mud or waste.
- Putting up solid barriers around the site.
- Properly covering trucks & vehicles that enter and leave the site-carrying building materials and building debris.
- Cleaning and watering the road and footpath adjacent to the site at frequent intervals.
- Using dust bags, spraying water when using stone cutters and making the working area wet before using the machineries.
- Not burning waste materials at site which causes smoke emitting carbon monoxide etc. a range of poisonous substances.
