Re: Petn. No. 36, Lafafat Hoossan Lane in Ward no. 034 Br. III

Dear Sir,

It has been revealed that under-construction building and other construction sites provide ample opportunity to the breeding of mosquitoes, including those that spread malaria and dengue. Since mosquito breeding at the said construction site is your responsibility, please endeavour to undertake following preventive measures on your own on a regular basis:

1. Empty each and every water reservoir at weekly intervals.

2. If you face any problem in emptying the water reservoirs, please sprinkle kerosene/diesel/MLO (mosquito larvicidal oil) on their water surface @ of 2.5-3 litres per 100 sq. m surface area at weekly intervals.

3. Please procure 1 or 2 Knapsack Sprayers (16-litre capacity) from the local market and select 2-3 persons from your staff for carrying out need-based larvicidal spray at the construction site. Technical knowhow for sprinkling/spraying, if required, may be obtained from the visiting vector control personnel of KMC.

4. The vector control personnel of KMC will check the aforesaid construction site at WEEKLY/FORTNIGHTLY intervals for mosquito breeding sources. If any sort of violation with regard to implementation of the anti-mosquito guidelines propounded herein is found on your part, legal steps will be resorted to by KMC authorities as per the existing norms.

5. Please cooperate and help KMC personnel in preventing transmission of mosquito-borne diseases in our beloved city.
