

নবদিগন্ত শিল্পনগরী কর্তৃপক্ষ Nabadiganta Industrial Township Authority

Memo No.: 175 /NDITA/W-5/06

Dated: 03 /02/2026

To,
Development Consultant Private Limited
Plot No. E1, Block – EP&GP
Nabadignata Industrial Township
Kolkata- 700091

Concurrence

This is to certify that the Nabadiganta Industrial Township Authority (NDITA) has developed and maintains all essential civic infrastructures within its jurisdiction, ensuring adequate support for the ongoing as well as proposed development activities in the township. The existing infrastructure has been systematically planned and executed to meet present requirements while also accommodating future urban and industrial growth.

In this regard, NDITA hereby provides its concurrence and affirms the availability and functionality of the following key facilities:

1. 1. Water Supply System:

NDITA maintains a comprehensive underground water supply pipeline network designed to ensure reliable and uninterrupted distribution of potable water across the township. The system is supported by a 2250 Kilo Litre Elevated Storage Reservoir, which facilitates continuous 24x7 supply and maintains sufficient water pressure to meet domestic, commercial, and industrial demands.

2. Sewage Treatment Plant (STP):

A fully operational Sewage Treatment Plant with a treatment capacity of 8.3 MLD is in place to process and manage wastewater generated within the township. The facility ensures that sewage is treated in compliance with environmental standards before final disposal, thereby contributing to sustainable and eco-friendly infrastructure management.

3. Storm Water Discharge Network:

NDITA has developed an integrated storm water drainage pipeline network to prevent water logging and ensure seamless discharge of storm water during monsoons and heavy rainfall. The system is further strengthened with 5 Nos. of booster pumping stations strategically installed to enhance the efficiency of storm water evacuation, thereby safeguarding public infrastructure and maintaining smooth civic functioning.

4. Solid Waste Disposal System:

An organized and robust waste disposal mechanism is maintained by NDITA to manage the systematic collection, segregation, handling, and disposal of solid waste generated within the township. This ensures a clean, hygienic, and well-managed urban environment for residents, workers, and visitors.

This concurrence is being issued by NDITA for all necessary administrative and official purposes, confirming the readiness and adequacy of the civic infrastructure under its jurisdiction.
