

TO WHOMSOEVER IT MAY CONCERN

SANCTION PLAN SIGNATURE VERIFICATION CLARIFICATION

This is to declare and certify the following:

1. That the Sanction Plan Signature verification is a valid one and the same can be verified by SCANNING the BAR CODE/QR CODE given at the bottom right hand corner of the Sanction Plan
2. That it depends on the system / computer on which the Plan is being viewed at and that is why on certain systems / computers Signature verification fails for technical/software issues and that is why it is standard procedure that is why BAR CODE/QR CODE is being given for verification on the Sanction Plan AND THAT our Sanction Plan validity can be verified from scanning of such BAR CODE/QR CODE
3. That Signature Validity has been shown on the Building permit for clarity purposes via screenshot mode.

I declare the above statement to be fully true and correct in nature.
