[illegible]

in the above said case, the court has held that the defendant is not liable for the loss of the goods, as the goods were not in the possession of the defendant at the time of the loss.

1. What is the difference between a function and a procedure?
 A function is a block of organized, reusable code that is used to perform a single, action. A function is generally created to perform one or more of the following actions:
 - Reuse a single code action within a program.
 - Organize a computer program into a series of simple blocks.
 - Perform related actions on data held in memory.
 A procedure is a block of organized, reusable code that is used to perform a single, action. A procedure is generally created to perform one or more of the following actions:
 - Reuse a single code action within a program.
 - Organize a computer program into a series of simple blocks.
 - Perform related actions on data held in memory.
