TO WHOMSOEVER IT MAY CONCERN

CLARIFICATION FOR DAG NO. AND KHATIAN NO.

This is to declare and certify that the Dag No and Khatian No as mentioned in our documents are all authenticated and true in nature and that the same can easily be verified from our Sanction Plan. The Searching Report is with regards to the entire 76 Decimals of Land and the present phase of the Project is 50.60 Decimals and that is why some other Dag No/Khatian No are being mentioned in the Searching Report.

It is an obvious fact that if the Total Land Parcel is bigger than the present project phase then certain other Dag / Khatian No may be seen in such report which is a complete natural phenomenon.

I declare the above statement to be fully true and correct.
