- During construction, following measures are to be strictly taken to reduce the effects of dust pollution from building construction site.
- Properly covering all building materials stacked at site like cement bags, sand, lime & stone chips.
 - Using water sprays or sprinklers to keep the dust down during activities such as concreting, plastering, breaking concrete and piling activities.
 - Washing the wheels of vehicles leaving the site, if they are carrying mud or waste.
 - Putting up solid barriers around the site.
 - Properly covering trucks & vehicles that enter and leave the site carrying building materials and building debris.
 - Cleaning and wetting the road and footpath adjacent to the site at frequent intervals.
 - Using dust bags, spraying water continuously at one end and making the working area wet before using the machinery.
 - Not burning waste materials at site which causes smoke containing carbon monoxide and a range of poisonous substances.
