Ques	Ans
Ques. 1. A person is standing on a platform. A train is moving past him. The person on the platform sees the train moving. The person on the train sees the platform moving. Explain.	Ans. 1. This is an example of relative motion. The person on the platform sees the train moving because the train is moving relative to the platform. The person on the train sees the platform moving because the platform is moving relative to the train.
