will Require Fresh Application
for Sanction.**

A suitable pump has to be provided i.e. pumping unfilfiltered water for the distribution to the flushing cisterns and urinals in the building in case unfilfiltered water from street main is not available.

CHECKED AND VERIFIED
A.E.(C)/SAFE(C)

Necessary steps should be taken for the safety of the lives of the adjoining public and private properties during construction.

Structural plan and design calculation as submitted by the applicant, dated 12/1/80, is hereby approved for the use of No. 5014-B (lighter) than has been listed with B. P. No. 5014-B (heavier) in the 1978 International Building Code of the Kansas Municipal Corporation which is hereby adopted by reference. The applicant's design deviation from the submitted structural design plan as noted on the drawings is hereby approved. The applicant is to be at the time of erection without exceeding their structural plan and design calculation and stability evidence in the design of the building. The applicant is to be at the time of erection without exceeding their structural plan and design calculation and stability evidence in the design of the building. The applicant is to be at the time of erection without exceeding their structural plan and design calculation and stability evidence in the design of the building.
