During construction following measures are to be strictly taken to reduce the effects of dust pollution from building construction sites

- Properly covering all building materials stacked at site like cement bags, sand, lime and stone chips.
- Using water sprays or sprinklers to keep the dust down during activities such as concreting, plastering, breaking concrete and piling activities.
- Washing the wheels of vehicles leaving the site. If they are clogging mud or waste.
- Putting up solid barriers around the site.
- Properly covering trucks & vehicles that enter and leave the site-carrying building materials and building debris.
- Cleaning and watering the road and footpaths adjacent to the site of frequent vehicles.
- Using dust cloths, spray paint or water when using stencils and creating the working area and around using the machinery.
- Not burning waste materials of site such as coal or bricks containing carbon monoxide and other range of poisonous substances.
